Short Description of the Dataset

The Hotel Booking Demand dataset contains information about hotel bookings, including hotel type, booking details, arrival information, guest details, room information, meal preferences, market segment, booking status, and other related attributes. The dataset can be used to explore booking patterns, cancellations, customer characteristics, and other factors related to hotel reservations.

Objective of the Analysis

The objective of this project is to perform Exploratory Data Analysis on the hotel booking dataset by understanding and cleaning the data, identifying missing and duplicate values, analyzing numerical and categorical variables, detecting outliers, studying relationships between variables, and discovering meaningful patterns and insights from the dataset.
